WORK EXPERIENCE

SDE - Intern

Feb 2022 — July 2022

Caravel.ai

Remote

- Built assessment module with admin and user portal using **React.js**. The assessment had questions of types **MCQ**, **Fill in blanks** or **OMR** type questions.
- On user side I handled score validation using **AWS**, **lambda functions** and proper **Report** system for users to check their attempts and a detailed summary page with score graphs for better UX for students and moderators.
- Later I started working on **Lexical** editor by **Facebook** and build a complete rich text editor with **equations** and **image** insertion as extra features.

MERN Stack developer

Nov 2020 — May 2021

Alfred Technologies

Remote

- Built complex and robust backend APIs using **Nodejs** and **MongoDB** for a language learning portal.
- Features, I developed were **JWT** authentication using **refresh** token, tracking user progress along with **Leitner's system** technique, admin APIs.
- For the frontend I developed **admin panel** using **React.js** for moderators and a **quiz** portal for users.

SDE - Intern

Sept 2020 — Dec 2020

Nelumbus Technologies

Remote

- Redefined and developed the website's event and course management system using **PHP** and **MySQL**.
- Built a **Food Delivery** app's backend using **Nodejs** and **MongoDB**, worked on **authentication** using **JWT**, **payment gateway**, and fixing few bugs.
- Developed few **Flutter** screens like Product-detail and cart screen for the same app.

PROJECTS

amigo - A social media webapp

- A complete social media platform where users can post/like/comment on tweets.
- From following users to **chatting** with them, it has everything one wants in a platform.
- Keeping security measures in mind, it uses **JWT** tokens for authentication, with completely protected routes.
- Built using **MERN stack**, **socket.io**, **Redux**

Seekho

- Seekho is a Indian **language learning** application which uses a learning technique called Leitners System, which make learning easy and fun.
- The app also has a **quiz** like portal for learners to test their performance and can compete with learner across the platform with a global leader board.
- The platform also has a admin panel built in **React** for admins to manage the quiz/words/users/feedback.
- Tech Stack - Fastify, MongoDB, React-Native, React, Typescript .

Shopify

- An E-commerce website, where one can add products to cart, **review/rate** them and purchase with **PayPal** payments.
- The app also has an **admin** panel for admins to manage orders/products/users.
- Tech Stack - **MERN stack** with **Redux**.

Video.tv

- It is a video streaming webapp, where users can watch/like/comment on videos. One can also subscribe to channels.
- The app has **google-login** feature and uses **youtube-api-v3** for data.
- Tech Stack - Reactjs, Redux, Firebase.

SKILLS

Frontend	React, Bootstrap, Tailwind, Redux
Backend	Express, Fastify, GraphQL APIs
Database	MongoDB, MySQL, PostgreSQL, Firebase
App development	React-Native, Basic Flutter
Languages	JavaScript, Typescript, C++

EDUCATION

Bachelors of Engineering

Nagpur University - 81% agg.

2018 - 2022
